

Pavan Patil Software Engineer

Professional Summary:

- Having **3.5 years** of experience in designing & developing enterprise applications and product using **Angular, JavaScript/TypeScript, Core Java, Spring Boot, REST api, Spring Data JPA, Hibernate** with Object oriented design principles.
- Used tools like **GIT, STS 4, Tomcat, Maven, VS Code, Postman, SQL Workbench** for application/product development in operating systems like Windows/Linux.
- Worked with agile model of software development methodology.
- Sound Knowledge of **NgRx, RxJS, OOPs Concepts, Collection, Exception, Java8 and code quality**.
- Used Design pattern like singleton in enterprise-level coding.
- Knowledge of current and emerging trends in software development.
- Sound problem-solving skills, communication skills and business understanding.

Skills Snapshot:

Technical Skills	Angular, JavaScript/TypeScript, Html, CSS, Bootstrap. Core Java, Spring, Spring boot, Spring Data JPA, MySQL, Postgres, Rest full Web services, GIT, Spring JDBC, Java8.
Functional Skills	JIRA, Documentation, Good business understating and communication.

Education Details:

Qualification	Educational Institution
B.TECH	R C Patel Institute of technology, Shirpur
HSC	R C Patel Jr Collage, Shirpur
SSC	R C Patel High School, Bhampur

Detailed Professional Experience:

Current Organization	Software Engineer, Yash Technologies Pvt. Ltd. (July 2025 – till date)
Previous Organization	Software Engineer, Hatchfast Software Labs. (Feb 2022 – June 2025)

Pavan Patil Software Engineer

Detailed Project Experience:

Project 1	Feb 2022 - June 2025
-----------	----------------------

Client Name	Hatchfast Software Labs
Project Name	Hatchfast
Team Size	8
Role	Software Engineer (FullStack Developer)
Environment	Angular, Javascript, Html, CSS Core java, Spring boot, Spring JPA, Postgresql, Java 8, Windows, Maven, Restful Web Services, Controllers

Brief Description of Project:

Worked on automating test cases for desktop application using selenium and playwright. The application supports web and API testing, along with AI-Based test automation features. Implemented a flow where test cases are recorded, executed, and result reports are generated. Organized tests into testcases, suites and jobs with support for scheduled and automatic execution. Contributed to enhancing efficiency and accuracy in testing processes.

Contributions:

- Writing controller, Services and Dao layer java classes in Spring boot using java8 features.
- Understanding use cases and translates them into functional requirement by using Spring boot.
- Managed application state on the frontend using NgRX and RxJS, simplifying state management for large-scale applications, which improve applications responsiveness and user experience, especially in high-traffic scenarios.
- Provide UAT and QA support, resolve bugs raised if any.
